How to install Doom Networks Root CA

Installing the root CA removes security warnings when visiting sites encrypted with Doom Networks signed certificates. This is to include all internal Doom Networks websites and resources.

All internal Doom Network Certs can be downloaded at <u>https://crt.doomnetworks.com</u> (Note: Names of Certificates may change but process is the same)

🐓 Certificate Import Wizard	~
Welcome to the Certificate Import Wizard	
This wizard helps you copy certificates, certificate trust lists, and certificate revocation lists from your disk to a certificate store.	
A certificate, which is issued by a certification authority, is a confirmation of your identity and contains information used to protect data or to establish secure network connections. A certificate store is the system area where certificates are kept.	
Store Location O Current User  Cucal Machine	
To continue, click Next.	
Sext Canc	el

 $\leftarrow$ 

Click on the button next to Local Machine to install the certificate for all users of the computer. This will require admin access on the computer that the certificate is being installed on. Then click the Next button.

← 🖉 Certificate Import Wizard	× Select Certificate Store ×
Certificate Import Wizard          Certificate Store         Certificate stores are system areas where certificates are kept.         Windows can automatically select a certificate store, or you can specify a location for the certificate.         Image: Automatically select the certificate store, or you can specify a location for the certificates in the following store         Image: Certificate store:         Image: Certificate store:	Select the certificate store you want to use.
	Click on the button next to Place all certificates in the following store and click the Browse button. This will open the Select Certificate Store window then click on Trusted Root Certification Authorities and click OK.

After click OK on the previous window it will bring you back to the Certificate Store window click Next to continue. On the next window click finish to complete the certificate import.
